By State Law, the BID cannot spend assessment revenues to perform services on properties that do not pay assessments (i.e. outside of the BID area). The BID can do the work with it's vendors, who are less expensive than the City's vendors, if a non-assessment source of funds for the work is available (ie a contract for maintenance with the City). Source: Miranda Paster, City Clerk's Office (213) 978-1111. There is no discretionary decision-making involved.

I can't believe that any City Department could resist a Council Member's insistence that the Department save money in his District. Especially when the numbers are so small. How much did it cost the City to mow the grass last week?

Thanks, Nate.

Hi John,

I contacted Street Services about the sprinkler...they should send someone to fix it soon.

As far as responsibility for maintenance of the median....I think it's a great idea, but last we heard Street Services is holding off on any contracts for median maintenance because of \$\$\$. I'm sure it will be easy to convince the city to give you guys the responsibility but as you know, they won't want to pay. Is there any chance that the Westchester BID would consider paying for the maintenance? I believe that the Gateway to LA BID currently maintains their medians and pay a contractor to do the work.

We have a CD-11 staff meeting with Street Services next Tuesday. The GM is suppose to attend to explain the cuts we have to deal with in the new budget. This meeting will be a perfect opportunity for me to ask if there is a way that the City can save money by transferring all the maintenance responsibilities to the Westchester BID.

Arturo and Nate,

This island also has water running of the south portion of the median. It is visible driving north on Sepulveda.

Has there been any progress in getting the City to give the responsibility of the maintenance to the Westchester Town BID as per our letter to the Councilman???

Please let us know.

Thanks

John

Subject: Island Sprinkler

Hi,

A sprinkler on the island between 83rd and 84th has been on since Thursday last. It is still on. The sprinkler is at the north end of the island.

Barbara
